

# PARABILIS

SPACE TECHNOLOGIES

## Affordable Space Solutions

Parabilis designs, develops, tests, and flies affordable propulsion and small satellite solutions.

Parabilis products include a hybrid upper stage for small launch vehicles, and several high-thrust, in-space propulsion solutions for both ESPA-class and CubeSat scale satellites.

## In-Space Maneuvering

Parabilis' ambitions are to leverage its products and the extensive space heritage of its founders to provide on-orbit services to its commercial and government customers such as rapid deployment, debris removal, and targeted re-entry of high-value assets.

## Propulsion Test Facility

Parabilis operates its own propulsion test facility in a convenient and accessible area of San Diego County. Facility is equipped with vertical and horizontal test stands with on-site DACS.
